SUMMARY

With over 7 years of experience, I'm a dedicated backend engineer specializing in Go and MongoDB. I've consistently delivered efficient and scalable solutions, notably optimizing a critical API's performance by 70%. I'm passionate about leveraging my skills to build robust systems and drive impactful results.

EXPERIENCE

Senior Backend Engineer

Kardinal AI

Paris, France | March 2021 - Current

- Built and managed various efficient microservices in Go, including APIs and KPI tracking.
- Owned and maintained crucial internal libraries, ensuring seamless integration across projects.
- Optimized a critical API, achieving a remarkable 70% performance improvement.
- Provided critical analysis and benchmarking to support better technological decisions.
- Mentored and empowered junior developers to rapidly grasp our internal stack and contribute effectively to projects.

Full-Stack Software Engineer

Polar Stork

Remote, US | May 2019 - April 2021

- Developed full-stack web and mobile apps across diverse industries, from concept to deployment.
- Led a team as Technical Lead for a VoIP mobile app supporting the Lebanese Red Cross during the pandemic.
- Influenced technology stack and system architecture decisions based on project requirements and goals.
- Introduced and championed Flutter adoption, enhancing development efficiency and cross-platform capabilities.
- Shared Flutter expertise with fellow developers, enabling them to overcome challenges and contribute effectively to project goals.

Founding Software Engineer

InnTrend

Beirut, Lebanon | January 2017 - January 2019

- Managed the entire software development process for a Quality Management platform.
- Designed and maintained the backend API using Spring Boot, ensuring smooth communication with the frontend.
- Developed and maintained the web application in Angular 6, enhancing user experience and interface design.
- Participated in business meetings and client calls to understand technical challenges.

EDUCATION

Computer and Communications Engineer

Saint Joseph University (U.S.J.)

Beirut, Lebanon | September 2015 - June 2018
