My Journey

Go Backend Engineer
Kardinal (Paris, France)

March, 2021 - Present

- Built and managed various efficient microservices in Go, including APIs and KPI tracking.
- Owned and maintained crucial internal libraries, ensuring seamless integration across projects.
- Optimized a critical API, achieving a remarkable 70% performance improvement.
- Revamped module architecture for scalability and maintainability.
- Provided critical analysis and benchmarking to support better technological decisions.

Full-Stack Software Engineer
Polar Stork (Remote, US)

May, 2019 - April, 2021

- Developed full-stack web and mobile apps across diverse industries, from concept to deployment.
- Led a team as Technical Lead for a VoIP mobile app supporting the Lebanese Red Cross during the pandemic.
- Influenced technology stack and system architecture decisions based on project requirements and goals.
- Introduced and championed Flutter adoption, enhancing development efficiency and cross-platform capabilities.

Full-Stack Developer
Inntrend (Beirut, Lebanon)

January, 2017 - February, 2019

- Sole developer, managing the entire software development process for a Quality Management platform.
- Designed and maintained the backend API using Spring Boot, ensuring smooth communication with the frontend.
- Developed and maintained the web application in Angular 6, enhancing user experience and interface design.
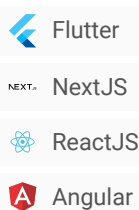

BS In Computers and Telecommunications
**Saint Joseph University, I.N.C.I. (Beirut, Lebanon)**
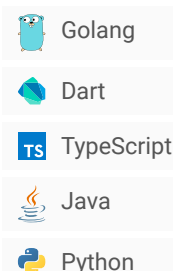

September, 2015 - June, 2018
